

That investigation has concluded. However,

Athletic

A preliminary, external, independent review of specific concerns within the Athletic Department of the University of New Mexico was concluded by retired federal judge Bruce Black, who reported his findings directly to me. The university is continuing to evaluate processes, procedures, and the overall culture of the department, and the broader UNM campus, to ensure best business, management and human relations practices. I can assure the UNM community that the university is committed to the diligent pursuit of educational excellence and campus quality of life.

and I

Since the initial review was broad, we have a few discrete issues to continue to look at. At this point, I am not going to talk specifics, but we have engaged nationally recognized experts to assist the University with the next steps that include looking further across multiple areas of the institution. When, and if, the time comes, we will comment on this matter. Until then, please be assured that evaluation our overall culture and improving it for all members of the UNM community is the priority in this process. In that regard.
